Event Type: Hackathon
Event Title: Internal Hackathon for SIH 2020
Jury Members: Mr. Saurabh Sinha, Mr. Prakash Pimpale, Mr. Tejas Hoskatti
Event Date: 18th Jan 2020
Organized for: SIESGST Students
Organized by: SIES GST
Target Audience: Undergraduate Students

Event Description

SIES GST organized an internal hackathon for scrutinizing SIH 2020 entries. Hackathon was held in two categories, Hardware and Software. Hackathon started at 9:30 a.m. with enthusiastic participation of 246 students, 30 teams in software and 12 teams in hardware category. Students developed their selected idea, from SIH 2020 portal, during internal hackathon on 18th Jan 2020 between 9:30 am to 2:00 pm at SIES Graduate School of Technology, Nerul.

Our hackers worked together over the last few weeks following a phased approach. During the first phase of the hackathon, participants worked together to develop a shared problem statement by SIH 2020. They also brainstormed and prioritized the critical barriers to adaptability and developed the design rules for creating adaptable organizations.

In the second phase, we began idea and team registration process. Around 250 students registered for the event with selected idea and team members.

In the third phase, participants fleshed out their ideas further over 40 teams formed around the most promising hacks, and these were developed further during internal hackathon. Teams presented their work to the jury members.

Towards the end of the day 7 teams from software and 4 teams from hardware were selected for participation in Smart India Hackathon 2020.

The jury members for the session were **Mr. Saurabh Sinha**, Founder & Managing Partner REIN Labs, for Hardware category and **Mr. Tejas Hoskatti**, Taiijas Infotech Private Ltd. Managing Director & Founder - Taiijas Infotech Private Ltd. and **Mr. Prakash Pimpale**, Principal Technical Officer at C-DAC, Mumbai for Software category. Students demonstrated their idea and implementation to the jury.

Based on innovativeness and effectiveness of the presented work juries selected 7 teams from Software category and 4 teams from Hardware category for SIH 2020.
