4. Impact Analysis

## Event Description

Department of Artificial Intelligence and Data Science of SIES Graduate School of Technology, Nerul, Navi Mumbai has successfully organized and conducted one week student development program on "**Flutter (Mobile Application Development)**" for SE, TE and BE students of AIML/IOT/AIDS/CE/ECS//IT/EXTC/PPT /Mechanical branch from 24<sup>th</sup> June to 29<sup>th</sup> June, 2024.

Developing for mobile platforms can be frustrating, and Flutter is Google's solution to make mobile development better. This course will teach you the basics of Flutter, including building a UI, using animations, and creating a database app.

Flutter training course is designed to learn how to use Flutter to develop high-quality, interactive mobile applications both for iOS and Android devices. In this training course, you will learn how to code using Dart and build beautiful, fast, native-quality iOS and Android apps. Even if you have ZERO programming experience.

Whether you are a newbie in mobile app development, or experienced with other mobile app frameworks, you'll enjoy the high-velocity development and quality apps that Flutter enables. The course is intended for Front End Web Developer, Full Stack Web Developer, Java Developer, or anyone who want to learn Flutter app development fundamentals.

**The following are some of Flutter characteristics:**

- **Fast:**  
Flutter code compiles to ARM or Intel machine code as well as JavaScript, for fast performance on any device.
- **Multi-platform:**  
Reach users on every screen  
Deploy to multiple devices from a single codebase: Mobile, web, desktop and embedded devices.
- **Productive:**  
Build and iterate quickly with Hot Reload. Update code and see changes almost instantly, without losing state.
- **Flexible:**  
Control every pixel to create customized, adaptive designs that look and feel great on any screen.
- **Dart:**  
Flutter is powered by Dart, a language for fast apps on any platform.

### Course Objectives:

- Syntax.
- Dart Functions (OOP).
- And Navigation implementing.
- Motion-Rich Widgets.
- Flutter And Dart Programming Language Introduction
- In Dart Programming Object-Oriented Programming With
- The Basics of Flutter Basics of Flutter Widgets Routing
- Material Design Guidelines With Visual, Behavioral, And
- Introduction To Firebase.
- Understand the concept and importance of Kotlin.

### Course Outcomes:

After This Course the students should be able to:

- Design and implement User interfaces and Layouts of mobile App.
- Design and Implement Database for mobile application
- Develop Mobile App using Android, Flutter and Kotlin
- Analyze the importance of various technologies in industry for mobile application development.

### Major topics covered during the workshop are:

- Introduction to Android
- Introduction of Flutter
- CREATING BEAUTIFUL UI WITH FLUTTER
- Kotlin and Android
- Kotlin and Android
- Creating Production Ready App
- Creating Production Ready App to testing and deploying
