

DS Club Events

1. "AI's impact on economy" a seminar conducted by Devesh Rajadhyax

The CEO of Cerelabs, a reputed AI services company, gave an engaging seminar on the several impacts the widespread usage of AI has and will have on the economy.

2. Introductory Session on Machine Learning

The club held an introductory session for the students of SIES GST on the basics of machine learning. The students were introduced to the different types of machine learning as well as to the workflow of a machine learning project. They were also given an elaborate explanation to supervised learning algorithms for regression and classification. During the session, the students completed two projects of their own as well.
