

DEPARTMENT OF ARTIFICIAL INTELLIGENCE And MACHINE LEARNING

Event Report

"Value Added Course on Crafting Intelligence : IoT & Data Visualization"

Event Information
Event Type: Value Added Course
Event title: " Crafting Intelligence : IoT & Data Visualization "
Event Date: January 06 to 11, 2025
Organized for: SIESGST Students of all branches
Organized by: AIML Department
Target Audience: SIESGST Students of all branches
Resource Person: Nita Patil, Dnyanada Khandagale (AIML Dept.)
Attachments: 1. Photographs (in JPEG/PNG)

2. Attendance (Screen Capture)
3. Feedback
4. Impact analysis

Event Description

From January 6 to 11, 2025, SIESGST hosted a comprehensive Value Added Course (VAC) on Crafting Intelligence : IoT & Data Visualization .This program was designed to enhance students' understanding and practical skills in the field of IoT and Data Visualization. The course was instructed by Prof. Nita Patil and Prof. Dnyanada Khandagale. Throughout the six days, students dwelled into essential topics such as Raspberry Pi OS installation, Introduction to ESP 32, Interfacing various sensors with different controllers, developing IoT applications, Python libraries, Matplotlib, Seaborn, Plotly & tools like Power BI & practical applications.

Students actively participated in hands-on labs and project implementations, solidifying their understanding and expertise. The final day featured a valuable session by industry expert Mr. Aditya Pagare, providing real-world insights and industry trends. The program successfully equipped students with advanced skills in IoT and Data Visualization, fostering a keen interest in pursuing careers in this dynamic field.

Additionally, the course encouraged collaborative learning and teamwork among the participants. Students had the opportunity to work on group projects, which not only enhanced their technical skills but also developed their ability to communicate and work effectively within a team. This holistic approach ensured that students were well-prepared for future challenges in the IoT & Data Visualization industry.

1. Photographs (in JPEG/JPG)

2. Attendance

25 students across all the departments attended this VAC.

It was really nice session					
Nice					

4. Impact analysis:

Students gained knowledge of IoT fundamentals including devices, sensors, networks and data. Also, students learned to create effective data visualizations using various tools and techniques. Hence, students developed a strong interest in IoT as well as Data Visualization technologies. They implemented mini projects as part of their coursework. This hands-on experience motivated them by

solidifying their commitment to pursue careers in this dynamic field. Students found the VAC useful and they want to attend such programs in future as well..

Outcome : Students were given project topics at the end of VAC in a group and they presented the projects they developed.
