### Action Taken Report on gaps in Syllabus:

Every department has formed the Department Advisory Board (DAB) in the year 2017. The members of DAB are alumni, parents, students, industry person, faculty, university academic council member and the department NBA (National Board of Accreditation) coordinator. The gaps in the syllabus are discussed in the DAB meetings and appropriate actions are taken to bridge the gaps. Figure 1 below shows the syllabus gap identification process.

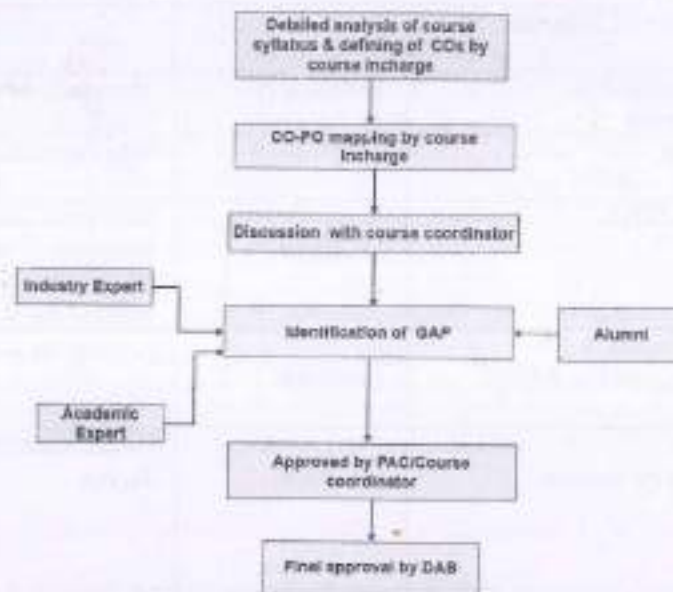

Figure 1: Gap Identification Process

The Table 1 below shows the action taken against gaps in syllabus discussed in DAB for 2018-19, 2017-18 and 2016-17

**Subject: Regarding suggestion which can be considered during the syllabus revision in Printing & Packaging Technology**

Respected sir,

I am writing on behalf of Department of Printing & Packaging Technology of SIES Graduate School of technology which is one of the premier institutes in Navi Mumbai imparting quality based technical education. To improve the quality of teaching learning we regularly conduct meetings with Faculty. During discussion in our Faculty meeting, we have suggested to include topics given in Annexure I.

Kindly consider the same during syllabus revision meetings.

ANNEXURE - I

SIES GRADUATE SCHOOL OF TECHNOLOGY  
Department of Printing & Packaging Technology

1. Package Design & Graphics: Course should be split into two to accommodate separate sessions for Solidworks and ArtiosCAD to do justice to both the softwares and cover content in depth.
2. Packaging Distribution & Logistics: Subject syllabus is too vast to cover full content with good depth.
3. New elective on e-publishing should be included in the new curriculum.
4. Some basics of Digital Printing should be included as part of core subject, since the current industry is going digital. Currently Digital & Security Printing is an elective subject.
5. Material Science & Technology subject may be removed since every packaging material is being studied in separate courses, where material science can be included in the introductory units.

4.	Ms. Bushra Shaikh	1. Syllabus of second year Engg. Is too vast. It can focus on the basic requirements. 2. Electives should be Blockchain, ML etc. 3. Mini Projects should have weight age.	
5.	Ms. Saritha L.R.	1. IoE subjects in BE IT can be part of WN or IoT IoT lab in V <sup>th</sup> sem. 2. LD subject lab content should be proper according to the theory syllabus.	
6.	Ms Seema Redekar	1. Java programming lab can have theory exam so that student take it seriously.	
7.	Ms. Savita Lohiya	1. BE electives are completely theoretical, needs practical's. Lectures are allocated more (52) that is not required and also not possible to take in a semester	
8.	Mr. Amit Pandhare .	1. Since FE having less number of C-Programming lecture logical development of students not proper and same of the lectures to be added in java or python.	
9.	Ms. Samundēswary	1. Elective lectures must have practicals. So students can explore. 2. Total no of lectures in all subjects are not possible to cover in semester. Possible reduce number of lectures. Programming subjects can be more in upcoming IT syllabus.
